PROFILE SUMMARY

BCA student (Parul University, 2024–27) with hands-on experience building and deploying full-stack web applications using React.js, Node.js, and Supabase. Strengthening data analytics skills through SQL, Excel, and Power BI. Published AI research presented at ICTDISBP 2026 (ICSSR-sponsored international conference). Seeking an entry-level role as a Frontend Developer or Data Analyst.

EDUCATION

Bachelor of Computer Applications

Expected: May 2027

Parul University — Parul Institute of Computer Application and Technology | Minor: Digital Marketing

Diploma in Computer Application and Business Management

Completed: 2024

First Class (67.45%)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python (Intermediate), Java (Intermediate), C, HTML5, CSS3

Frameworks: React.js, Node.js

Data & Analytics: SQL, Microsoft Excel (PivotTables, VLOOKUP), Power BI

Developer Tools: GitHub, Vercel, VS Code, PyCharm, IntelliJ IDEA

PROJECTS

E-Commerce Web Application | JavaScript, Node.js, CSS, Supabase [GitHub](#) · [Live Demo](#)

- Built a full-stack e-commerce platform with 20+ product listings, shopping cart, and checkout flow.
- Designed an Admin Dashboard with full CRUD operations — add, update, and delete products in real time.
- Integrated Supabase as the backend database and storage layer, replacing traditional server-side setup.
- Developed RESTful APIs using Node.js to handle all product and cart operations.

Portfolio Website | React.js, CSS, Vercel [GitHub](#) · [Live Demo](#)

- Built a fully responsive portfolio website showcasing 3+ projects, skills, and contact information.
- Designed modern UI with smooth navigation, clean layout, and mobile-first responsiveness.
- Deployed via Vercel with continuous deployment through Git; version control via GitHub.

Weather Web Application | JavaScript, Weather API, CSS [GitHub](#)

- Developing a real-time weather app that fetches temperature, humidity, and wind data by user location.
- Integrating OpenWeather API with responsive UI featuring weather icons and multi-day forecast display.
